

A METHOD AND APPARATUS FOR SUPPORTING LINE-CONDITIONED
DATA STREAM (LCDS) DATA IN A JOB-ORIENTED PRINTING
ENVIRONMENT

ABSTRACT OF THE DISCLOSURE

5 This invention relates to a method and apparatus for supporting line-conditioned data stream (LCDS) data in a job-oriented environment. More particularly, the invention is directed to a job-oriented system that also has the ability to process LCDS data. In addition, the LCDS data is processed in a manner that will exploit advanced job management functions of the system.
